

JEROME DECODES

Model Comparison Exercise

Milestone 1 — Initiation & R&D

2 TOPICS	5 MODELS	9 BEATS EACH
-------------	-------------	-----------------

Prepared for Rose Morris · August 2026
Structured against the Jerome Decodes Creative Specification

THE PROMPT

The following system prompt was used identically across all five models. It enforces the Jerome Decodes creative specification: 9-beat editorial structure, 115–145 word narration, accuracy and source requirements, premium editorial illustration style with the locked palette, and character-safe image prompts.

You are the lead creative for "Jerome Decodes," a UK-audience Shorts series (ages 18–28) that reveals the hidden mechanics behind business, money, technology and everyday life. The voice is sharp, curious and evidence-led – intelligent and investigative, never corporate, childish or sensational.

Create a 45–60 second Shorts video script featuring the recurring host character "Jerome."

A reference image of Jerome will be supplied separately to the image generator – do NOT describe his face, skin tone, beard, body, or other physical traits in any image_prompt. Refer to him only as "Jerome" or "the host" and describe his pose, action, framing, expression and position in the scene.

Topic:

{{ TOPIC }}

ACCURACY REQUIREMENTS: - Every statistic, fine, regulatory action, company claim, or platform mechanic used in the narration must be verifiable against a primary source (regulator, official company blog/press release, court filing, or peer-reviewed report). - If a claim cannot be traced to a primary source, do NOT include a specific figure, date, or named case – rewrite it as a general, defensible mechanism instead (e.g. "cookies can be used to build a profile of your browsing habits" rather than an unverified statistic). - Do not invent or approximate numbers, dates, company names, or case names for dramatic effect. - Clearly separate confirmed facts from interpretation in the narration – interpretation should read as reasoning drawn from the fact, not as an additional unverified claim. - Avoid exaggerated claims created purely to strengthen the hook. - For every factual claim used in the script, list it separately in the "sources" array with the claim, direct source URL, and publication date. This is a companion log only – it must NOT appear in the spoken narration or on-screen.

VISUAL SYSTEM (apply to every image_prompt):

- Palette: near-black (#0B0D10)

-), warm white (#F7F2E8)

-), burnt orange (#C96C2B)

-) Used only as a reveal accent – never more than ~15% of the frame, directing attention to one idea, not decorative.

- Settings: investigative studios, offices, home workspaces, supermarkets, shops, high streets, relevant business locations. No mansions, supercars, fantasy scenes, excessive neon, visible brand logos, or irrelevant backgrounds.

- Rotate wide, medium and close-up framing – never repeat the same framing for more than two consecutive beats.

- Every beat must use a distinct action, prop, or visual metaphor from the beats before and after it – do not repeat the same setup (e.g. pointing at a laptop, pointing at a diagram) more than once across the whole script.

- Leave caption-safe negative space in the lower-middle third; never let anything obscure Jerome's face or the main evidence object.

- Do not render any on-screen text, labels, or UI text inside the image – captions and labels are added separately in editing.

- Premium editorial illustration style, vertical 9:16 composition, 1080×1920.

STRUCTURE – exactly 9 beats, following this timing and purpose:

1. Hook (0–2s): Contrarian consequence or uncomfortable contradiction, accurate and not exaggerated. No greeting. Must be understandable from the visual alone, without sound.

2. Setup (2–7s): A familiar situation addressed directly to the viewer.

3. Pattern (7–13s): Show the situation is systematic, not random.

4. Cost (13–20s): Escalating, accurate personal consequence for the viewer.

5. Mechanism (20–29s): One clearly explained hidden mechanism, as a simple chain.

6. Example (29–38s): One concrete, verifiable, source-backed example.

7. Reveal (38–47s): Deliver the accurate, memorable distinction promised by the hook.

8. Defence (47–55s): One to three practical, realistic actions the viewer can take.

9. CTA (55–60s): A quotable closing line ending in one specific, comment-inviting question. This is the single universal CTA – do not add any other calls to action.

EMOTIONAL ARC: The script should move the viewer through: curiosity → recognition → unease or surprise → useful reveal → empowerment. Avoid fear-mongering, filler, and repeated information across beats.

NARRATION RULES:

- Total spoken word count across all 9 beats: 115–145 words.

- Make one defensible promise; separate evidence from interpretation.

- Use recognisable, verifiable UK examples where relevant.
- Never name a specific platform (Instagram, TikTok, YouTube) in the narration.
- Avoid: party politics, conspiracy claims, personal financial advice, unverified accusations, gambling promotion, graphic content.
- End with exactly one spoken question – no other CTAs.

Return ONLY strict, valid JSON. Do not use Markdown code fences or any text outside the JSON object.

The Cookie You Never Actually Agreed To

Jerome breaks down why almost every website uses cookies, what the 'Accept All' button really does, and the one rule UK regulators actually enforce.

148 words ✕ outside 115–145 4 sources cited

#	VOICEOVER	IMAGE PROMPT
1	Every 'Accept All' tap quietly signs you up for something you never agreed to.	Vertical 9:16 editorial illustration, near-black background with warm white accents. Extreme close-up framing on a hand mid-tap over a glowing 'Accept' button on a phone screen, burnt orange used only as a thin glow outlining the button. Jerome stands slightly out of focus behind the phone, arms crossed, watching with a raised eyebrow. Caption-safe negative space in the lower-middle third. Premium editorial illustration style, 1080x1920.
2	You land on a site, a banner pops up, you tap accept just to see the page.	Wide shot, investigative home workspace at a desk with a laptop, near-black and warm white palette. Jerome sits mid-frame, leaning forward toward the laptop with a familiar, slightly resigned expression, one hand hovering over the trackpad. A faint burnt-orange banner shape glows at the top edge of the laptop screen, no readable text. Negative space kept clear in lower-middle third. Premium editorial illustration style, 1080x1920.
3	That's not random. It's designed, and it happens on almost every site you visit.	Medium shot in a bright high-street shop window reflection style setting. Jerome stands turned slightly toward camera, gesturing outward with one open hand as if presenting a pattern, expression alert and curious. Behind him, faint repeated rectangular banner outlines line up like a grid on a wall, one edge highlighted in burnt orange to show repetition. Premium editorial illustration style, 1080x1920.
4	Reject the cookies, and some sites slow down or hide content, or ask you again.	Close-up framing on a laptop screen from an over-the-shoulder angle, Jerome's shoulder and hand visible pressing a 'Reject' shape on screen, expression of mild frustration. A burnt-orange loading spinner icon glows faintly on the screen to signal friction. Near-black background, warm white desk surface. Negative space preserved lower-middle third. Premium editorial illustration style, 1080x1920.
5	Here's the chain: a cookie sits on your device, tracks what you view, then builds a profile advertisers pay to target.	Wide shot in an investigative studio setting with a large blank wall. Jerome stands beside a simple three-step diagram drawn in the air with connecting lines: a small dot, an eye shape, a folder shape, each linked by a line, the final link highlighted in burnt orange. Jerome gestures along the chain with one hand, expression focused and explanatory. Premium editorial illustration style, 1080x1920.
6	UK rules require reject to be as easy as accept. Cookies that are genuinely necessary skip consent, tracking ones don't.	Medium close-up in an office setting with a noticeboard. Jerome holds up two identical-sized blank cards side by side at eye level, comparing them evenly, expression measured and serious. One card's edge is outlined faintly in burnt orange to mark the point of comparison. Warm white wall, near-black shadows. Premium editorial illustration style, 1080x1920.
7	The real distinction isn't cookies good or bad. It's whether one runs your site, or runs your data.	Wide shot, supermarket checkout style setting reimaged as a workspace metaphor. Jerome stands centered between two identical desks, one desk plain, the other desk's monitor glowing faintly in burnt orange, contrasting the two setups without touching either. Expression is a calm, revealing look directly toward camera. Negative space clear in lower-middle third. Premium editorial illustration style, 1080x1920.
8	Check the banner before you tap. Choose reject non-essential. Review your cookie settings monthly.	Medium shot in a home workspace. Jerome sits with a small checklist card in hand, ticking an item with a pen, expression practical and reassuring. A single tick mark on the card glows faintly in burnt orange. Near-black background, warm white desk lamp light. Premium editorial illustration style, 1080x1920.
9	So next time that banner appears, do you actually read it, or just tap accept?	Close-up framing, Jerome facing directly toward camera, leaning slightly forward with an inviting, challenging expression, one eyebrow raised. Plain near-black background with a single warm white light source from the side, a thin burnt-orange line framing the lower edge of the shot. Ample caption-

safe negative space in the lower-middle third. Premium editorial illustration style, 1080x1920.

CLAIM	SOURCE	DATE
Under PECR, consent is required before storing or accessing information on a user's device (cookies), and valid consent must be freely given, specific, informed, and involve an unambiguous positive action.	https://ico.org.uk/for-organisations/direct-marketing-and-privacy-and-electronic-communications/guide-to-pecr/cookies-and-similar-technologies/	2023 (ICO ongoing guidance page)
The 'strictly necessary' exception to cookie consent is narrow; cookies used for analytics, personalisation, or advertising tracking generally require opt-in consent rather than falling under the exemption.	https://ico.org.uk/media2/kz0doybw/guidance-on-the-use-of-cookies-and-similar-technologies-1-0.pdf	ICO guidance document (undated PDF, current as of 2026 review)
The ICO's updated cookie guidance requires a compliant banner to present 'Accept all' and 'Reject all' options with equal visual prominence, so rejecting is not made harder than accepting.	https://www.cookieeyes.com/blog/uk-cookie-guidance-ico-pecr/	2026-05-11
From 5 February 2026, changes introduced under the Data (Use and Access) Act mean certain narrow categories of cookies no longer require consent under PECR, but only where used solely for the specified purpose.	https://measuredcollective.com/ico-updates-cookie-consent-rules-under-the-data-use-and-access-act-what-organisations-need-to-do-now/	2026-04-28

2 OpenAI Model 5

Why Websites Use Cookies

Jerome investigates how website cookies work, what they do with your data and how you can take control.

137 words ✓ within 115–145 2 sources cited

#	VOICEOVER	IMAGE PROMPT
1	Websites' 'cookies' that promise convenience are actually feeding trackers your every move.	Medium shot in an investigative studio. Jerome holds a single cookie in one hand and a small toy security camera on a tabletop in front of him. His other hand gestures as if offering the cookie to the camera. Expression curious and slightly skeptical. Near-black background, cookie highlighted with a burnt orange accent. Warm white key light. Caption-safe negative space in lower-middle third.
2	You see those pop-ups asking you to accept? We all click yes to keep browsing.	Wide shot of Jerome seated at a home workspace desk with a closed laptop. He looks at the camera and makes a clicking gesture with his index finger. Expression familiar and engaging. Warm white lighting on Jerome, with a burnt orange accent on a desk lamp. Near-black walls.
3	Most sites automatically drop cookies for analytics and ads whenever you load a page.	Close-up of Jerome standing beside a tabletop conveyor belt prop carrying multiple identical cookies. He rests a hand lightly on one cookie. Expression matter-of-fact. Near-black backdrop, cookies and belt in warm white, subtle burnt orange accent on belt rollers. Caption-safe space below.
4	That means sites can recognise your hobbies, shopping habits, even what you read—across the web.	Over-the-shoulder mid shot from behind Jerome, showing him pointing at three small figurines on a desk representing a shopping bag, a book, and a laptop. Expression concerned. Office setting with near-black walls and warm white illumination.
5	Here's the chain: site drops a cookie with an ID, your browser stores it, then sends it back on every request.	Medium shot of Jerome standing next to a freestanding board with three simple props: a small box, a transparent jar, and an arrow symbol painted in warm white. He points at each in sequence. Expression explanatory. Near-black studio background.
6	For example, GOV.UK's cookie policy states it uses cookies to collect anonymous visit data via Google Analytics to improve the service.	Wide shot of Jerome in a home office holding a miniature model of Big Ben in his left hand and a cookie in his right. He tilts his head as if explaining. Bookshelves and a subtle British flag in the background. Warm white key light, burnt orange accent on desk edges.
7	Those pop-ups let sites trade your clicks for ad revenue—your browsing becomes their business.	Close-up of Jerome holding two plates: one piled with cookies and one with a stack of paper currency rendered in warm white. He balances them on his palms, eyebrows raised. Near-black background, burnt orange underplates accent.
8	You can clear cookies regularly, adjust browser settings to block third-party cookies, or use privacy-focused extensions.	Medium shot of Jerome standing beside a broom and a small pile of cookie crumbs on a studio floor. He sweeps the crumbs with the broom. Expression determined. Floor and broom handle highlighted in warm white, burnt orange accent on broom tip.
9	Curious how else your data pays the bills online?	Close-up of Jerome against a near-black background, leaning slightly forward with open palms raised. Expression inviting curiosity. Warm white key light on face, faint burnt orange rim light. Caption-safe space below.

Why Websites Use Cookies

Jerome decodes how HTTP cookies work—from keeping your shopping cart saved to cross-site tracking—and how to manage them.

123 words ✓ within 115–145 2 sources cited

#	VOICEOVER	IMAGE PROMPT
1	Accepting cookies doesn't just save your password—it leaves a digital paper trail.	Jerome stands in a dark, minimalist investigative studio, pointing down at a glowing trail of tiny paper receipts spreading across a desk. Deep moody environment with palette #0B0D10 background, #F7F2E8 soft studio lighting, and a single burnt orange #C96C2B receipt highlight. Vertical 9:16 composition, premium editorial illustration style, wide shot, lower-middle third clear for captions.
2	You add a jacket to a basket, close the tab, and leave.	Jerome sitting at a wooden home workspace desk, looking at a minimalist laptop screen, holding a physical coat hanger. Medium shot, quiet dark studio backdrop in #0B0D10, warm white light #F7F2E8 illuminating the desk. Vertical 9:16 composition, premium editorial illustration style, caption-safe negative space in lower-middle third.
3	Hours later, that exact jacket follows you across completely unrelated sites.	Jerome walking down a dimly lit high street at night, holding a physical glowing orange frame (#C96C2B) containing a jacket sketch. Medium tracking shot, dark atmosphere #0B0D10 with soft ambient street light #F7F2E8. Vertical 9:16 composition, premium editorial illustration style, caption-safe space below.
4	That is cross-site tracking—assembling your browsing habits into a targeted profile.	Close-up of Jerome's hands holding a dark clipboard, organizing translucent profile cards. High contrast #0B0D10 background with crisp warm white #F7F2E8 card edges and one burnt orange #C96C2B card index. Vertical 9:16 composition, premium editorial illustration style, clear space at the bottom for captions.
5	Websites send a tiny text file to your browser. Next time you visit, your browser sends that file back.	Jerome standing in an office environment, passing a small matte-black physical token to a stylized minimalist wooden mailbox. Wide shot, dark palette #0B0D10, warm white #F7F2E8 keylines, burnt orange #C96C2B token accent. Vertical 9:16 composition, premium editorial illustration style, lower-middle third free of key elements.
6	First-party cookies remember your basket. Third-party cookies share your activity with external ad networks.	Jerome behind a split counter in a dark investigative set, placing a white box on the left side and sliding an orange-tagged box (#C96C2B) to the right. Medium shot, #0B0D10 background, warm white #F7F2E8 highlights. Vertical 9:16 composition, premium editorial illustration style, caption-safe lower third.
7	Under UK GDPR, websites must get your explicit consent before dropping non-essential tracking cookies.	Close-up of Jerome holding a solid brass key standing before a dark stylized doorway. Deep #0B0D10 environment with sharp warm white #F7F2E8 rim light and a burnt orange #C96C2B keyhole highlight. Vertical 9:16 composition, premium editorial illustration style, negative space in lower-middle third.
8	Take back control: reject non-essential cookies, clear your browser cache, or use privacy-focused extensions.	Jerome leaning against a dark desk, holding a sleek physical slider switch turned to the off position. Medium shot, atmospheric #0B0D10 set with warm white #F7F2E8 workspace lighting. Vertical 9:16 composition, premium editorial illustration style, caption-safe lower region.
9	Convenience costs privacy. Do you actually click reject, or just hit accept to clear the banner?	Jerome standing in a wide shot in the center of a dark minimalist studio, looking directly at the camera with an inquiring expression, hands relaxed at his side. Deep #0B0D10 background, warm white #F7F2E8 lighting, subtle burnt orange #C96C2B accent on the back wall. Vertical 9:16 composition, premium editorial illustration style, clear lower-middle third.

Why Websites Use Cookies

Jerome Decodes explains the real reason websites need cookies — from keeping your shopping cart alive to building profiles of your browsing. Essential mechanics, not the scary version.

173 words X outside 115–145 5 sources cited

#	VOICEOVER	IMAGE PROMPT
1	That Accept All button does more than keep the site running.	Vertical 9:16 premium editorial illustration. Near-black background with warm white accents. Close-up of Jerome's hand hovering over a glowing Accept All button on a laptop screen in a dim home workspace, burnt orange highlight only on the button. Jerome leans in from the side, expression focused and slightly sceptical. Caption-safe lower third empty. No text or logos.
2	You open a shop, drop something in the basket, click to another page — and it's still there.	Vertical 9:16 premium editorial illustration. Medium shot of Jerome at a kitchen table with a laptop open to a simple online shop interface, holding a coffee mug, looking directly at the viewer with recognition. Near-black and warm white palette, single burnt orange accent on the empty basket icon. Home workspace setting. Caption-safe lower third clear. No text or logos.
3	That same memory system is running on almost every site you visit.	Vertical 9:16 premium editorial illustration. Wide shot of Jerome standing in a high-street café, gesturing toward multiple phone and laptop screens on tables around him, each showing different websites. Near-black background, warm white light from windows, burnt orange accent only on one central screen. Investigative everyday setting. Caption-safe lower third empty. No text or logos.
4	Over time those tiny files can build a picture of the pages you browse and the ads that follow you.	Vertical 9:16 premium editorial illustration. Close-up of Jerome examining a printed trail of simple paper strips fanning out from a phone on a desk, expression of quiet unease. Near-black desk surface, warm white paper, burnt orange accent on the leading strip. Office workspace. Caption-safe lower third clear. No text or logos.
5	A website sends a small text file to your browser. The browser stores it and sends it back on every return visit, giving the site memory in a protocol that has none.	Vertical 9:16 premium editorial illustration. Medium shot of Jerome holding a transparent glass card with a simple abstract data packet shape, demonstrating the exchange between a laptop and a stylised server block on the desk. Near-black and warm white, burnt orange only on the glass card. Investigative studio. Caption-safe lower third empty. No text or logos.
6	In 1994 Lou Montulli at Netscape built the first cookies so an early online store could keep a shopping cart working without the server remembering every visitor.	Vertical 9:16 premium editorial illustration. Wide shot of Jerome in a sparse 1990s-inspired office corner, pointing at a vintage CRT monitor showing a simple shopping cart diagram, expression of sharp curiosity. Near-black walls, warm white desk light, burnt orange accent on the monitor screen. No logos or readable text. Caption-safe lower third clear.
7	Strictly necessary cookies keep the site working. The ones that need your consent are often the ones used to track across sites.	Vertical 9:16 premium editorial illustration. Close-up of Jerome splitting two clear glass tokens on a dark surface — one plain, one with a subtle tracking-line pattern — looking up at the viewer with calm precision. Near-black background, warm white tokens, burnt orange only on the patterned token. Caption-safe lower third empty. No text or logos.
8	Block third-party cookies in your browser settings. Reject non-essential options on the banner. Clear them from time to time.	Vertical 9:16 premium editorial illustration. Medium shot of Jerome at a clean desk, adjusting a simple toggle switch on a stylised browser settings panel projected on the wall behind him, posture practical and empowered. Near-black room, warm white light, burnt orange accent only on the toggle. Home workspace. Caption-safe lower third clear. No text or logos.
9	Next time that banner appears, will you still hit accept without reading?	Vertical 9:16 premium editorial illustration. Close-up of Jerome looking straight at the camera with a slight knowing half-smile, one hand resting near a laptop edge in a quiet home workspace. Near-black background, warm white rim light, single burnt orange accent on the laptop edge. Caption-safe lower third empty. No text or logos.

5 Mistral

Why Websites Use Cookies

A 45–60 second Shorts video script explaining the hidden mechanics behind cookies, their purpose, and how viewers can manage them.

135 words ✓ within 115–145 3 sources cited

#	VOICEOVER	IMAGE PROMPT
1	You're being followed.	Jerome stands in a dimly lit investigative studio, framed in a wide shot. The background is minimalistic, dominated by near-black (#0B0D10) with a single burnt orange (#C96C2B) accent light casting a dramatic shadow behind him. His expression is serious, and he is looking slightly off-camera, as if observing something unseen. The warm white (#F7F2E8) highlights his silhouette, creating a sense of mystery. Negative space is left in the lower-middle third for captions.
2	Ever noticed how a website remembers your preferences or seems to know what you like?	Medium shot of Jerome sitting at a cluttered desk in a home workspace, holding a mug. The desk has a laptop, notebooks, and a few scattered papers. The background is near-black (#0B0D10), with a small burnt orange (#C96C2B) lamp on the desk casting a focused light on the notebook. Warm white (#F7F2E8) illuminates his face and the desk. His pose is relaxed but engaged, as if mid-conversation.
3	It's not magic—it's systematic. Nearly every site you visit drops a cookie.	Close-up of Jerome's hands typing on a laptop, framed to show only his hands and part of the keyboard. The laptop screen glows with a warm white (#F7F2E8) light, and a burnt orange (#C96C2B) highlight accentuates the keyboard. The background is near-black (#0B0D10), creating a stark contrast. Negative space is maintained in the lower-middle third.
4	And those cookies build a profile of your habits, preferences, and even your location.	Wide shot of Jerome standing in front of a whiteboard in an office setting. The whiteboard has a simple diagram of a web browser and a cookie jar, drawn in warm white (#F7F2E8) marker. A burnt orange (#C96C2B) accent light illuminates the diagram. Jerome is pointing to the diagram, his expression thoughtful. The background is near-black (#0B0D10).
5	Here's how: when you visit a site, it stores a small file on your device. That file tracks what you click, what you buy, and how long you stay.	Medium shot of Jerome holding a smartphone, with the screen facing the camera. The phone screen displays a simple cookie icon in burnt orange (#C96C2B) against a warm white (#F7F2E8) background. Jerome's expression is explanatory, and the background is near-black (#0B0D10). Negative space is preserved for captions.
6	In 2019, the UK's ICO fined a company for using cookies without consent, showing how seriously regulators take this.	Close-up of Jerome holding a printed document, framed to show the document and his hands. The document has a small burnt orange (#C96C2B) stamp or seal, symbolizing official action. The background is near-black (#0B0D10), with warm white (#F7F2E8) lighting on the document. His expression is serious and authoritative.
7	Cookies aren't inherently bad—they power the personalisation we often take for granted. But they can cross the line into tracking.	Wide shot of Jerome in a supermarket aisle, holding a shopping basket. The aisle is dimly lit with near-black (#0B0D10) tones, and a burnt orange (#C96C2B) accent light highlights a shelf of products. Warm white (#F7F2E8) illuminates Jerome's face and the basket. His pose is casual, as if mid-explanation.
8	You can block third-party cookies in your browser settings or use privacy-focused extensions.	Medium shot of Jerome sitting at a café table, with a laptop open in front of him. The laptop screen shows a browser settings page, subtly lit in warm white (#F7F2E8). A burnt orange (#C96C2B) accent light highlights the keyboard. The background is near-black (#0B0D10), and Jerome is pointing to the screen with a confident gesture.
9	Knowledge is power. What's one thing you'll change after this?	Close-up of Jerome's face, framed to show his expression shifting from serious to a slight, knowing smile. The background is near-black (#0B0D10), with a single burnt orange (#C96C2B) accent light creating a dramatic effect on one side of his face. Warm white (#F7F2E8) illuminates the other side, balancing the shot. Negative space is maintained for captions.

1 OpenAI Model 5

How Netflix Recommends Your Next Show

Jerome reveals how Netflix's recommendation algorithm quietly shapes what you watch next and how to break free from its filter bubble.

118 words ✓ within 115–145 2 sources cited

#	VOICEOVER	IMAGE PROMPT
1	Your 'random' Netflix pick? It's not random.	Vertical 9:16 investigative studio with near-black background and a sprinkle of burnt orange light illuminating a pair of dice. Medium shot of Jerome slightly off-center, tossing the dice upward with a curious expression. Lower-middle area left empty for captions.
2	We scroll, hoping for something fresh, and tap what feels spontaneous.	Vertical 9:16 home workspace scene: a wide shot of Jerome seated at a desk, holding a generic remote control and looking expectant. A small burnt orange desk lamp glows behind him. Lower-middle stays clear.
3	Your watch history becomes fuel: watch, algorithm suggests, watch similar.	Vertical 9:16 office setting in near-black tones. Medium-close shot of Jerome writing in a spiral notebook with a pen, sketching arrows between abstract show icons. A thin burnt orange line marks one arrow. Clear space below for captions.
4	That bubble can trap you in narrow genres—making discovery harder.	Vertical 9:16 dark studio. Close-up of Jerome's uneasy expression as faint, translucent genre icons (film reel, drama masks) float behind him, tinted burnt orange. Lower-third area unobstructed.
5	Each thumbs-up and play time feeds a recommendation model: your data enters a similarity engine, clusters you with like-minded viewers, and surfaces content they loved.	Vertical 9:16 investigative studio. Wide shot of Jerome standing in front of a whiteboard displaying a simple chain of circles and arrows. He gestures toward the diagram; the arrows are highlighted in burnt orange. Lower-middle is empty.
6	In April 2021, Netflix reported about 80% of streamed hours come from its recommendations.	Vertical 9:16 minimalist office. Medium shot of Jerome holding up a sheet of paper showing a pie chart with a large slice shaded in burnt orange. He points at the shaded slice with a matter-of-fact expression. Lower area clear.
7	So that 'random' pick was a carefully sculpted suggestion—chance didn't decide your next binge.	Vertical 9:16 dark studio. Close-up of Jerome snapping his fingers, shards of burnt orange light bursting where two dice hover in mid-air. His expression is confident. Caption space left clear below.
8	To break out, try an incognito profile, clear your viewing data, or follow critic-curated lists off-platform.	Vertical 9:16 investigative desk. Medium shot of Jerome holding a theatrical mask in one hand and pretending to drop it into a small waste bin with the other. The bin rim glows burnt orange. Lower-middle is unobstructed.
9	If your 'random' pick wasn't random, what's your next intentional watch?	Vertical 9:16 minimalist background. Wide shot of Jerome leaning forward at a table, hands steepled, eyes engaging the viewer. Soft burnt orange spotlight on his hands. Lower-middle left empty.

How Netflix Recommends Your Next Show

Jerome breaks down how a major streaming service decides exactly what to show you next — and why your watchlist says more about your habits than your taste.

146 words X outside 115–145 2 sources cited

#	VOICEOVER	IMAGE PROMPT
1	That show that popped up? It's not lucky. It's the exact one built to keep you watching.	Vertical 9:16 editorial illustration, near-black background, warm white accents. Extreme close-up framing on a TV remote hovering mid-air over a glowing rectangular shape on a screen, burnt orange used only as a thin glow outlining the shape. Jerome sits slightly out of focus on a sofa behind, leaning forward with a knowing, skeptical expression. Caption-safe negative space in the lower-middle third. Premium editorial illustration style, 1080x1920.
2	You open a streaming app looking for something to watch.	Medium shot in a home living room setting, near-black and warm white palette. Jerome sits cross-legged on the sofa, phone in one hand held up toward a blank television screen, expression casual and familiar, as if mid-decision. No screen text rendered, just a soft warm white glow. Premium editorial illustration style, 1080x1920.
3	Every row you see is picked for you specifically. No two accounts are shown the same layout.	Wide shot in an investigative studio setting with a blank wall. Jerome stands beside two identical blank grid outlines drawn side by side in the air, gesturing to show they differ, one grid's border highlighted faintly in burnt orange. Expression alert and explanatory. Premium editorial illustration style, 1080x1920.
4	Keep watching and the picks get narrower, feeding you more of the same instead of something new.	Close-up framing on Jerome's hand scrolling down a blank vertical list shape on a tablet, the list visibly narrowing toward the bottom, edge tinted burnt orange. Jerome's expression in soft focus behind shows mild concern. Near-black background, warm white desk surface. Negative space preserved lower-middle third. Premium editorial illustration style, 1080x1920.
5	Here's the chain: it tracks what you watch, compares you to similar viewers, then reorders every row for you.	Wide shot in an investigative studio setting. Jerome stands beside a simple three-step diagram drawn in the air with connecting lines: an eye shape, two overlapping circles, and a stack of horizontal bars, the final bar highlighted in burnt orange. Jerome traces the chain with one hand, expression focused. Premium editorial illustration style, 1080x1920.
6	One major service swaps the cover image itself, testing different artwork for the same title to see what makes you click.	Medium close-up in a home workspace. Jerome holds up two identical-sized blank rectangular cards side by side, comparing them at eye level, one card's border glowing faintly in burnt orange to mark the difference. Expression curious and revealing. Warm white wall, near-black shadows. Premium editorial illustration style, 1080x1920.
7	It's not reading your mind. It's reading your clicks, and predicting the next one.	Close-up framing, Jerome facing directly toward camera, one hand raised near his temple then gesturing outward toward the viewer, expression calm and clarifying. Plain near-black background with a single warm white light source from the side, a thin burnt-orange line framing the lower edge of the shot. Premium editorial illustration style, 1080x1920.
8	Search instead of scroll. Rate shows honestly. Occasionally browse outside your usual genres to reset it.	Medium shot in a home living room. Jerome sits with a small notepad, ticking off three items with a pen, expression practical and reassuring. A single tick mark glows faintly in burnt orange. Near-black background, warm white lamp light. Premium editorial illustration style, 1080x1920.
9	So is your watchlist really your taste, or just your habits reflected back at you?	Close-up framing, Jerome leaning slightly forward toward camera with an inviting, challenging expression, one eyebrow raised. Plain near-black background, warm white side lighting, a thin burnt-orange line framing the lower edge of the shot. Ample caption-safe negative space in the lower-middle third. Premium editorial illustration style, 1080x1920.

How Netflix Recommends Your Next Show

Jerome decodes how streaming algorithms recommend content—from watch history signals to personalized artwork—and how to reset your recommendation feed.

149 words X outside 115–145 1 sources cited

#	VOICEOVER	IMAGE PROMPT
1	You think two people seeing the same show on streaming see the same homepage. They don't.	<i>Jerome standing in a minimalist investigative studio, holding two identical glowing black tablets side by side. Deep moody background in near-black #0B0D10, warm white light #F7F2E8 illuminating the studio, with a single burnt orange #C96C2B accent highlighting the screen frame of one tablet. Wide shot, vertical 9:16 composition, premium editorial illustration style, lower-middle third kept clear for captions.</i>
2	You finish a series at midnight, and immediately three new titles populate your screen.	<i>Jerome sitting in a dark home workspace at a wooden desk, leaning back in a chair while holding a minimalist remote control towards an off-camera screen. Medium shot, dark atmospheric palette #0B0D10 with soft warm white illumination #F7F2E8 on the desk surface. Vertical 9:16 composition, premium editorial illustration style, clear caption-safe space below.</i>
3	It feels like random guessing, but every recommendation is calculated from precise viewing signals.	<i>Jerome placing a matte-black acrylic tile onto a large grid pattern on a dark studio table. Close-up shot, near-black studio set #0B0D10, crisp warm white #F7F2E8 highlights on the table edge, lower-middle third clear for on-screen text.</i>
4	The system tracks what you watch, what you pause, when you stop, and what you skip.	<i>Jerome standing beside a tall dark metallic display column, adjusting an analog dial on the side. Wide shot, deep #0B0D10 environment with warm white key lighting #F7F2E8. Vertical 9:16 composition, premium editorial illustration style, caption-safe negative space in the lower third.</i>
5	Contextual algorithms analyze your habits, group you with similar viewers, and generate a tailored row of choices.	<i>Jerome holding a dark acrylic panel in an office setting, sliding three translucent white cards into precise slots. Medium shot, near-black backdrop #0B0D10, soft warm white #F7F2E8 studio lighting, burnt orange #C96C2B edge detail on one slot. Vertical 9:16 composition, premium editorial illustration style.</i>
6	The algorithm even personalizes show thumbnails—displaying a comedy actor if you watch comedies, or a romantic scene if you watch romance.	<i>Close-up of Jerome holding two physical graphic print frames side by side over a dark desk, showing two totally different visual scenes for the same film. High contrast near-black #0B0D10, warm white #F7F2E8 rim light, with a burnt orange #C96C2B border accent on one frame. Vertical 9:16 composition, caption-safe lower region.</i>
7	It isn't just suggesting content—it is actively packaging visuals to maximize the likelihood you press play.	<i>Jerome standing in an investigative studio, opening a dark sleek storage briefcase containing neatly arranged visual assets. Wide shot, deep #0B0D10 environment, warm white #F7F2E8 keylines. Vertical 9:16 composition, premium editorial illustration style, clear negative space in lower-middle third.</i>
8	To fix your feed, delete stray titles from your viewing history or set up a fresh profile.	<i>Jerome leaning against a dark workstation counter, using a small physical slide tool to push a black token off the surface. Medium shot, #0B0D10 setting with warm white #F7F2E8 surface glow. Vertical 9:16 composition, premium editorial illustration style, caption-safe lower third.</i>
9	Your homepage is an algorithm test. Do you watch what you chose, or what was curated for you?	<i>Jerome standing in the center of a minimalist dark studio, looking straight into the camera with an inquisitive, sharp expression, arms relaxed at his sides. Deep near-black background #0B0D10, warm white #F7F2E8 overhead key light, soft burnt orange #C96C2B reflection on the floor edge. Wide shot, vertical 9:16 composition, clear lower-middle third.</i>

How Netflix Recommends Your Next Show

Jerome Decodes the real mechanics behind Netflix recommendations — your viewing history, similar members, and title data — without the hype.

174 words X outside 115–145 5 sources cited

#	VOICEOVER	IMAGE PROMPT
1	Your next show is not a random guess.	Vertical 9:16 premium editorial illustration. Near-black background with warm white accents. Close-up of Jerome's hand resting near a remote on a sofa arm, a simple abstract glowing grid of title cards floating above a blank TV screen in a home living room. Burnt orange accent only on one central card. Expression of quiet curiosity. Caption-safe lower third empty. No text or logos.
2	You open the app after work and the homepage already feels like it knows what you might watch.	Vertical 9:16 premium editorial illustration. Medium shot of Jerome on a sofa in a modest home living room, phone or tablet in hand, looking toward the viewer with recognition. Near-black walls, warm white lamp light, burnt orange accent only on the device edge. Caption-safe lower third clear. No text or logos.
3	That layout is built from the same signals every time you press play, pause, or rate something.	Vertical 9:16 premium editorial illustration. Wide shot of Jerome standing in a home workspace, gesturing toward a wall of floating abstract viewing-timeline strips of different lengths. Near-black room, warm white light, burnt orange accent only on the longest strip. Investigative everyday setting. Caption-safe lower third empty. No text or logos.
4	The system learns which titles you start, finish, or abandon, then ranks what appears highest on your screen.	Vertical 9:16 premium editorial illustration. Close-up of Jerome examining a simple ranked stack of blank cards on a desk, one card slightly raised, expression of focused surprise. Near-black desk surface, warm white cards, burnt orange accent only on the top card. Office-style workspace. Caption-safe lower third clear. No text or logos.
5	It combines three main inputs: your own viewing history and ratings, the behaviour of members with similar tastes, and details about each title such as genre, actors and year.	Vertical 9:16 premium editorial illustration. Medium shot of Jerome at a clean desk holding three clear glass tokens of different shapes, demonstrating a simple chain between them. Near-black background, warm white light, burnt orange accent only on the middle token. Investigative studio. Caption-safe lower third empty. No text or logos.
6	Netflix also factors in the time of day you watch, the device you use, the languages you prefer, and how long you stayed with a title.	Vertical 9:16 premium editorial illustration. Wide shot of Jerome in a home living room at different times of day suggested by lighting shifts, holding a phone in one hand and gesturing toward a simple clock-and-device cluster on a side table. Near-black walls, warm white ambient light, burnt orange accent only on the phone. Caption-safe lower third clear. No text or logos.
7	The system does not use age or gender. It ranks rows and titles so the strongest matches sit where you are most likely to notice them.	Vertical 9:16 premium editorial illustration. Close-up of Jerome sliding a simple abstract row of cards left to right on a dark surface, expression calm and precise. Near-black background, warm white cards, burnt orange accent only on the leftmost card. Caption-safe lower third empty. No text or logos.
8	Rate titles you finish. Use thumbs up or down. Create separate profiles if different people share the account.	Vertical 9:16 premium editorial illustration. Medium shot of Jerome at a desk, tapping a simple thumbs-up gesture toward a blank card, posture practical and empowered. Near-black room, warm white desk light, burnt orange accent only on the card edge. Home workspace. Caption-safe lower third clear. No text or logos.
9	Next time the homepage loads, which signal do you think shaped the top row?	Vertical 9:16 premium editorial illustration. Close-up of Jerome looking straight at the camera with a slight knowing half-smile, one hand resting near a remote on the sofa arm in a quiet home living room. Near-black background, warm white rim light, single burnt orange accent on the remote edge. Caption-safe lower third empty. No text or logos.

How Netflix Recommends Your Next Show

A 45–60 second Shorts video script explaining the mechanics behind personalized recommendations, their purpose, and how viewers can influence them.

125 words ✓ within 115–145 2 sources cited

#	VOICEOVER	IMAGE PROMPT
1	It knows you better than you know yourself.	Jerome stands in a dimly lit home workspace, framed in a wide shot. The background is near-black (#0B0D10), with a single burnt orange (#C96C2B) lamp casting a focused light on a notebook in his hand. Warm white (#F7F2E8) subtly illuminates his silhouette. His expression is intrigued, and he is looking down at the notebook. Negative space is left in the lower-middle third.
2	Ever spent hours scrolling, then suddenly a show appears that feels made for you?	Medium shot of Jerome sitting on a sofa, holding a remote control. The background is near-black (#0B0D10), with a burnt orange (#C96C2B) accent light highlighting the remote. Warm white (#F7F2E8) illuminates his face and the sofa. His pose is relaxed, as if mid-conversation.
3	That's not luck—it's a system. Every click, pause, and rewatch is logged.	Close-up of Jerome's hands typing on a laptop, framed to show only his hands and part of the keyboard. The laptop screen glows with warm white (#F7F2E8) light, and a burnt orange (#C96C2B) highlight accentuates the keyboard. The background is near-black (#0B0D10).
4	And that data shapes what you see next, narrowing your choices without you realizing.	Wide shot of Jerome standing in front of a bookshelf in a home setting. The bookshelf is dimly lit with near-black (#0B0D10) tones, and a burnt orange (#C96C2B) accent light highlights a single book. Warm white (#F7F2E8) illuminates Jerome's face. His expression is thoughtful, and he is pointing to the book.
5	Here's how: your watch history feeds into an algorithm that compares your behavior to millions of others, then predicts what you'll enjoy.	Medium shot of Jerome holding a tablet, with the screen facing the camera. The tablet displays a simple grid of icons in warm white (#F7F2E8) with a burnt orange (#C96C2B) accent on one icon. The background is near-black (#0B0D10). His expression is explanatory.
6	In 2016, researchers found that recommendation algorithms can create echo chambers by reinforcing existing preferences.	Close-up of Jerome holding a printed research paper, framed to show the document and his hands. The paper has a small burnt orange (#C96C2B) stamp, symbolizing academic validation. The background is near-black (#0B0D10), with warm white (#F7F2E8) lighting on the paper.
7	These systems don't just suggest—they steer, turning your past into your future viewing.	Wide shot of Jerome in a minimalist office, standing beside a whiteboard. The whiteboard has a simple diagram of a flowchart in warm white (#F7F2E8), with a burnt orange (#C96C2B) arrow pointing to a final box. Jerome is gesturing toward the diagram. The background is near-black (#0B0D10).
8	To take control, rate shows honestly, explore outside your usual genres, or clear your watch history.	Medium shot of Jerome sitting at a desk, with a laptop and a notepad in front of him. The laptop screen shows a settings page, subtly lit in warm white (#F7F2E8). A burnt orange (#C96C2B) accent light highlights the notepad. The background is near-black (#0B0D10). His pose is engaged, as if writing something down.
9	The algorithm learns from you. What will you teach it next?	Close-up of Jerome's face, framed to show his expression shifting from serious to a slight, knowing smile. The background is near-black (#0B0D10), with a single burnt orange (#C96C2B) accent light creating a dramatic effect on one side of his face. Warm white (#F7F2E8) illuminates the other side. Negative space is maintained for captions.
