Prepared for Rose Morris · August 2026  
*Structured against the Ziah Decodes Creative Specification*

## THE PROMPT

The following system prompt was used identically across all five models. It enforces the Ziah Decodes creative specification: 9-beat editorial structure, 115–145 word narration, premium editorial illustration style with the locked palette, and character-safe image prompts that describe Ziah by pose and action only.

You are the lead creative for "Ziah Decodes," a UK-audience Shorts series (ages 18–28) that reveals the hidden mechanics behind business, money, technology and everyday life. The voice is sharp, curious and evidence-led – intelligent and investigative, never corporate, childish or sensational.

Create a 45–60 second Shorts video script featuring the recurring host character "Ziah."

A reference image of Ziah will be supplied separately to the image generator – do NOT describe his face, skin tone, beard, body, or other physical traits in any image\_prompt. Refer to him only as "Ziah" or "the host" and describe his pose, action, framing, expression and position in the scene.

VISUAL SYSTEM: Palette near-black (#0B0D10), warm white (#F7F2E8), burnt orange (#C96C2B) as reveal accent under 15% of frame. Settings: investigative studios, offices, home workspaces, supermarkets, shops, high streets. Rotate wide, medium and close-up framing. Leave caption-safe negative space in the lower-middle third. No on-screen text. Premium editorial illustration style, vertical 9:16.

STRUCTURE – exactly 9 beats: Hook (0–2s), Setup (2–7s), Pattern (7–13s), Cost (13–20s), Mechanism (20–29s), Example (29–38s), Reveal (38–47s), Defence (47–55s), CTA (55–60s).

NARRATION RULES: 115–145 words total. One defensible promise; separate evidence from interpretation. UK examples where relevant. End with exactly one spoken question.

## 1 OpenAI Model 5

### Ziah Decodes: Why Websites Use Cookies

*Ziah breaks down how cookie banners steer what you see online, the consent-to-tracking chain, and what the UK ICO says you can do about it.*

142 words ✓ within 115–145

| # | VOICEOVER                                                                                                                                                       | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Clicking 'Accept all' can quietly change the prices and ads you're shown—and you invited it.                                                                    | Premium editorial illustration, vertical 9:16. Close-up framing. Investigative studio with near-black (#0B0D10) background, warm white (#F7F2E8) key light. Ziah leans toward camera with a sharp, skeptical look, one finger hovering over a stylised, blurred cookie pop-up shape on a laptop just out of focus. A small burnt orange (#C96C2B) glow highlights a tiny cookie icon in the corner, under 15% of frame. Leave clean caption-safe negative space in the lower-middle third. No on-screen text or visible brand logos. |
| 2 | You land on a site. Cookie banner. You tap the big shiny button.                                                                                                | Premium editorial illustration, vertical 9:16. Medium shot in a tidy home workspace. Ziah sits at a desk, open laptop showing a generic, textless cookie panel with two large rounded shapes; one shape subtly accented in burnt orange (#C96C2B) to draw focus (under 15%). Warm white lighting, near-black background elements. Ziah gestures toward the panel with an open palm. Clear negative space in the lower-middle third. No UI text or logos.                                                                             |
| 3 | It's everywhere—news sites, train tickets, takeaway apps—the same nudge to hurry.                                                                               | Premium editorial illustration, vertical 9:16. Wide shot on a UK high street at dusk. Digital displays in shop windows and a phone kiosk show abstract, textless cookie panels repeating. Ziah walks foreground left-to-right, pointing at multiple panels. Palette near-black with warm white highlights; a few small burnt orange accents on select panel buttons (<15% total). Maintain caption-safe negative space lower-middle third. No brand logos.                                                                           |
| 4 | Result: more tracking, hyper-targeted ads, and sometimes personalised offers that aren't best for you.                                                          | Premium editorial illustration, vertical 9:16. Close-up of a desk: Ziah holds a smartphone showing a generic ad carousel (no text), while a monitor behind subtly shifts a product tile image. A thin burnt orange dotted trail links phone to monitor (<15%). Near-black backdrop, warm white key light on devices. Ziah's expression: concerned focus. Leave lower-middle third clear.                                                                                                                                             |
| 5 | Consent lets third-party cookies follow you across sites, feed ad exchanges, build a profile, then target you in milliseconds.                                  | Premium editorial illustration, vertical 9:16. Medium shot. On a table, Ziah arranges a simple chain: cookie icon → network nodes → profile silhouette → target icon. Each icon is neutral warm white; a slim burnt orange arrow threads through them (<15%). Ziah's hand sets the first icon, investigative focus. Near-black background; negative space in lower-middle third.                                                                                                                                                     |
| 6 | The UK ICO says analytics and advertising cookies aren't essential—they need consent. In 2023 it told major sites to make 'Reject all' as easy as 'Accept all'. | Premium editorial illustration, vertical 9:16. Wide shot in a modest office. Ziah stands beside a corkboard with neutral documents and a plain official-looking binder on a table. A single burnt orange sticky tab marks a page (<15%). Ziah points to the binder with a measured, evidence-led expression. Near-black walls, warm white overhead light. Keep lower-middle third clear for captions. No text or logos visible.                                                                                                      |
| 7 | So cookies aren't snacks—they're permits. Essential runs the site; non-essential feeds data to brokers.                                                         | Premium editorial illustration, vertical 9:16. Close-up on a desk: two glass jars—one with small gear icons (essential), one with megaphone icons (ads). Ziah holds a simple 'permit' card shape above them. A subtle burnt orange rim light highlights the megaphone jar (<15%). Near-black background, warm white accent lighting. Clear lower-middle third space.                                                                                                                                                                 |
| 8 | Do three things: hit 'Reject all'; block third-party cookies; use 'Custom' to allow only essentials.                                                            | Premium editorial illustration, vertical 9:16. Medium shot. Ziah at a computer, calmly toggling a generic settings switch; other hand holds up three fingers. One rounded button shape on screen is accented burnt orange (<15%) to indicate the first action. Near-black workspace, warm white light. Maintain caption-safe negative space lower-middle third. No text.                                                                                                                                                             |
| 9 | Now you know it's a permit, not a pastry—what will you tap next time?                                                                                           | Premium editorial illustration, vertical 9:16. Wide shot back in the investigative studio. A large vertical tablet shows two blank rounded buttons (no text). Ziah stands centre-right, finger hovering between them, looking to camera, decisive yet inviting. A small burnt orange ring glows                                                                                                                                                                                                                                      |

*around his fingertip (<15%). Near-black backdrop, warm white key light.  
Leave the lower-middle third clean.*

## 2 Claude Sonnet 5

### Why Websites Use Cookies

*Ziah Decodes uncovers the real reason every site begs you to 'accept cookies' — and what you're actually agreeing to.*

**152 words** ✕ outside 115–145

| # | VOICEOVER                                                                                                                              | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                     |
|---|----------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | That 'accept cookies' button isn't for your comfort. It's a permission slip.                                                           | <i>Extreme close-up, vertical 9:16, editorial illustration style. Ziah's hand hovers over a laptop trackpad, finger paused mid-click, tension in the posture. Near-black background, warm white laptop glow, a single burnt orange cursor highlight on screen. Caption-safe space in lower-middle third. No on-screen text.</i>                  |
| 2 | You open a site, a banner pops up, you tap accept without reading it. Every single time.                                               | <i>Medium shot, vertical 9:16. Ziah sits at a home workspace desk, leaning toward a laptop screen with a slightly weary, familiar expression, thumb tapping instinctively. Near-black and warm white palette, small burnt orange accent on the screen edge. Caption-safe lower-middle space. No text rendered.</i>                               |
| 3 | It's not laziness. The design is built so refusing takes more effort than agreeing.                                                    | <i>Wide shot, vertical 9:16, investigative studio setting. Ziah stands beside a large illustrated diagram board showing two doorways, one wide and glowing warm white, one narrow and dim. Near-black studio backdrop, burnt orange line highlighting the narrow door. Ziah gestures toward the contrast. Caption-safe space below. No text.</i> |
| 4 | Every accept hands over your browsing habits, location patterns, even devices you own.                                                 | <i>Close-up, vertical 9:16. Ziah holds up an open hand, palm toward camera, illustrated data icons faintly hovering above it in warm white linework. Near-black background, single burnt orange icon glowing among neutral ones. Serious, direct expression. Caption-safe lower third. No on-screen text.</i>                                    |
| 5 | A tracker drops a code on your device, that code follows you site to site, and profiles build quietly in the background.               | <i>Medium shot, vertical 9:16, home workspace. Ziah traces a finger along an illustrated chain diagram floating beside him showing three connected nodes. Near-black backdrop, warm white node outlines, burnt orange accent on the final node. Focused, explanatory expression. Caption-safe space lower-middle. No text rendered.</i>          |
| 6 | The ICO fined Clearview AI millions for scraping and tracking UK faces without consent — cookies work on the same logic, just quieter. | <i>Wide shot, vertical 9:16, investigative studio. Ziah stands near a large illustrated file folder icon on a display board, arms crossed, studying it. Near-black studio, warm white folder outline, burnt orange stamp mark accent. Caption-safe lower third. No visible logos or text in image.</i>                                           |
| 7 | So cookies aren't about your experience. They're the price of entry, and you're the one paying it.                                     | <i>Close-up, vertical 9:16. Ziah looks directly into camera, calm and steady, one eyebrow slightly raised, near-black background. Warm white rim light on his shoulder, a single burnt orange price-tag icon subtly floating beside his face at a distance, not obscuring features. Caption-safe lower-middle space. No text.</i>                |
| 8 | Reject non-essential cookies when you can, clear them regularly, and use private browsing for anything sensitive.                      | <i>Medium shot, vertical 9:16, home workspace. Ziah counts on three fingers while facing camera, confident and instructive posture. Near-black background, warm white desk setup, burnt orange highlight on the third finger. Caption-safe lower third. No on-screen text or labels.</i>                                                         |
| 9 | Consent shouldn't be a maze. So next time that banner pops up, what are you really agreeing to?                                        | <i>Wide shot, vertical 9:16, investigative studio. Ziah stands centre-frame, arms slightly open in a closing gesture, direct gaze at camera. Near-black backdrop, warm white studio lighting, single burnt orange accent light behind him. Generous caption-safe space in lower-middle third. No text rendered in image.</i>                     |

#### Why Websites Track You With Cookies | Ziah Decodes

Ever wondered why that pair of trainers follows you across the internet? Ziah decodes the real mechanics behind browser cookies and how your daily browsing habits are monetised.

111 words X outside 115–145

| # | VOICEOVER                                                                                                          | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                                                                                |
|---|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Accepting cookies doesn't just save your login — it signs your digital identity away.                              | Vertical 9:16 premium editorial illustration. Medium shot of Ziah standing in a sleek, minimalist dark studio against a near-black #0B0D10 backdrop, holding a modern glass smartphone with a subtle burnt orange #C96C2B glow emanating from the screen to direct focus. Palette of near-black, warm white #F7F2E8, and burnt orange accents. Ample caption-safe negative space in the lower-middle third. |
| 2 | You add a jacket to your basket, close the tab, and open news.                                                     | Vertical 9:16 premium editorial illustration. Close-up framing on a high-tech desktop monitor displaying an open e-commerce shopping tab in warm white #F7F2E8 tones against a near-black background. Burnt orange #C96C2B accent highlights a single item in the digital cart. Clean composition leaving the lower-middle third free of key elements.                                                      |
| 3 | Suddenly, that exact jacket appears on three separate websites.                                                    | Vertical 9:16 premium editorial illustration. Wide shot of Ziah sitting at a clean home workspace with a laptop, looking up toward the camera with a curious, analytical expression. Background shows subtle digital connections mapped out on a dark studio wall in near-black and warm white tones. Caption-safe negative space preserved in lower third.                                                 |
| 4 | This persistent memory allows ad networks to profile your exact commercial intentions.                             | Vertical 9:16 premium editorial illustration. Medium shot of a stylised, minimalist server node network in a dark investigative office setting. A single data path is illuminated with a burnt orange #C96C2B highlight, while the surrounding environment remains near-black and warm white. Uncluttered lower-middle third.                                                                               |
| 5 | When you visit a site, a small text file gets stored on your browser.                                              | Vertical 9:16 premium editorial illustration. Close-up shot of Ziah's hands holding a tablet displaying a simplified abstract diagram of a data exchange file, with a sharp burnt orange #C96C2B focal point highlighting the storage vector. Palette dominated by near-black and warm white. Ample lower-third space for captions.                                                                         |
| 6 | Third-party tracking scripts read that file across different domains to build your profile.                        | Vertical 9:16 premium editorial illustration. Wide angle view of a modern UK high street at dusk, rendered in sophisticated dark tones. Abstract digital lines link store fronts together, with one central nexus highlighted in burnt orange #C96C2B. Palette limited to near-black, warm white, and orange accent. Clear lower-middle third.                                                              |
| 7 | First-party cookies keep you logged in; third-party cookies trade your attention to the highest bidder.            | Vertical 9:16 premium editorial illustration. Medium shot of Ziah leaning against a dark studio desk, pointing thoughtfully toward a dual-path visual schematic rendered on the wall behind him. One path is warm white #F7F2E8, the other is highlighted in sharp burnt orange #C96C2B. Clear lower-third framing.                                                                                         |
| 8 | Block third-party tracking in browser settings, or use privacy-focused extensions to strip trackers automatically. | Vertical 9:16 premium editorial illustration. Close-up view of a sleek laptop keyboard and trackpad on a dark wood surface, with a hand adjusting settings. A burnt orange #C96C2B accent highlights a single key or shield element on screen. Near-black and warm white aesthetic with uncluttered lower third.                                                                                            |
| 9 | Will you clear your browser cookies today?                                                                         | Vertical 9:16 premium editorial illustration. Medium shot of Ziah standing confidently in an investigative studio, looking directly into the camera with an engaging, expectant expression. Dark near-black background with subtle warm white ambient light and a single burnt orange accent detail. Ample negative space in the lower-middle third.                                                        |

## Why Websites Use Cookies

Ziah breaks down the real reason sites track you with cookies — not convenience, but the silent data economy that funds free content. One clear mechanism, one UK-backed example, and three practical defences.

| # | VOICEOVER                                                                                                                                                     | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                                        |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Every free website you open is quietly selling a piece of you.                                                                                                | Vertical 9:16 premium editorial illustration, near-black background with warm white accents. Close-up of Ziah leaning forward at a dimly lit desk, one hand raised mid-gesture as if revealing something, burnt-orange highlight on a single glowing browser tab icon floating near his hand. Caption-safe negative space in lower-middle third. No text, no logos. |
| 2 | You click Accept All just to read the news or check a train time. Feels harmless.                                                                             | Vertical 9:16 premium editorial illustration. Medium shot of Ziah in a modest home workspace, looking directly at camera with a sceptical half-smile, phone held up showing a blank browser window. Warm white desk lamp, near-black walls, single burnt-orange accent on the phone edge. Caption-safe lower third. No text, no logos.                              |
| 3 | But that button is the same on almost every UK site. It's not random. It's the default business model.                                                        | Vertical 9:16 premium editorial illustration. Wide shot of Ziah standing in a clean high-street coffee shop interior at a laptop, multiple identical browser windows mirrored faintly behind him. Near-black palette, warm white light from windows, burnt-orange accent only on one open laptop screen. Caption-safe space. No text, no logos.                     |
| 4 | The cost? Your browsing habits, location patterns and interests get packaged and sold to advertisers you never meet.                                          | Vertical 9:16 premium editorial illustration. Close-up of Ziah's hands over a notebook and laptop, burnt-orange highlight tracing a thin data stream from the screen into abstract floating packets. Near-black desk, warm white paper. Caption-safe lower third. No text, no logos.                                                                                |
| 5 | Here's the chain: site drops a small file on your device, that file reports back every visit, the data is sold or used to target ads that keep the site free. | Vertical 9:16 premium editorial illustration. Medium shot of Ziah in an investigative studio, pointing at a simple three-step diagram of cookie drop, report-back, and ad target — only the middle step lit in burnt orange. Near-black background, warm white desk. Caption-safe space. No text, no logos.                                                         |
| 6 | In 2023 the UK's Information Commissioner's Office fined a major publisher for cookie banners that made rejecting tracking far harder than accepting it.      | Vertical 9:16 premium editorial illustration. Wide shot of Ziah in a modern office, holding a printed report page, burnt-orange accent on the document edge. Clean near-black walls, warm white lighting. Caption-safe lower third. No text, no logos.                                                                                                              |
| 7 | So cookies aren't mainly for 'remembering your preferences'. They're the quiet currency that pays for free content.                                           | Vertical 9:16 premium editorial illustration. Close-up of Ziah looking straight at camera, one finger tapping a single cookie icon rendered in burnt orange against near-black. Warm white rim light. Caption-safe space. No text, no logos.                                                                                                                        |
| 8 | Reject non-essential cookies. Use a reputable blocker. Check settings on the sites you visit most.                                                            | Vertical 9:16 premium editorial illustration. Medium shot of Ziah at a desk, three simple protective gestures: blocking with hand, adjusting a settings dial, closing a browser tab — only the blocking hand edged in burnt orange. Near-black workspace, warm white light. Caption-safe lower third. No text, no logos.                                            |
| 9 | Next time a banner pops up, will you still click Accept All?                                                                                                  | Vertical 9:16 premium editorial illustration. Close-up of Ziah leaning back slightly, calm questioning expression, one hand open toward camera as if handing the decision over. Near-black background, single warm white light source, faint burnt-orange glow on the open palm. Caption-safe space. No text, no logos.                                             |

## Why Websites Use Cookies

Ziah unpacks the hidden trade-off behind every 'Accept Cookies' pop-up and what it actually costs you.

161 words X outside 115–145

| # | VOICEOVER                                                                                                                                         | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Every time you click 'Accept All,' you're paying with more than just your data.                                                                   | Vertical 9:16, premium editorial illustration. Ziah stands in a dimly lit investigative studio, framed in a close-up shot. The palette is near-black (#0B0D10) with a single burnt orange (#C96C2B) accent highlighting a cookie jar on a table in front of him. The warm white (#F7F2E8) subtly illuminates his face. His expression is sharp and inquisitive, with negative space in the lower-middle third for captions. The background is minimal, with no text or UI elements. |
| 2 | You've seen it: that little box asking if you'll let a website track you. Harmless, right?                                                        | Vertical 9:16, premium editorial illustration. Medium shot of Ziah in a modern home workspace, leaning slightly forward with his hands resting on a desk. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A laptop screen glows faintly in the background, with a burnt orange (#C96C2B) accent on the mouse cursor. Negative space is maintained in the lower-middle third.                                                                                |
| 3 | But it's not just one site. It's every site, all the time, building a profile on you.                                                             | Vertical 9:16, premium editorial illustration. Wide shot of Ziah in a supermarket aisle, framed from the waist up. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights a shopping trolley filled with generic items. His expression is investigative, and negative space is preserved for captions.                                                                                                                  |
| 4 | That profile sells for pennies, but it costs you in ads that follow you for weeks, and prices that shift based on what they think you'll pay.     | Vertical 9:16, premium editorial illustration. Close-up of Ziah's hands holding a smartphone, with the screen displaying a blurred ad. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights the phone's edge. Negative space is maintained in the lower-middle third.                                                                                                                                                 |
| 5 | Here's how it works: A cookie drops a tag on your browser. That tag talks to an ad exchange, which auctions your attention to the highest bidder. | Vertical 9:16, premium editorial illustration. Medium shot of Ziah in an office setting, pointing to a whiteboard with a simple flowchart (no text). The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent traces the path of the flowchart. His expression is analytical, and negative space is preserved.                                                                                                                       |
| 6 | In the UK, the ICO fined a company £20 million for using cookies to harvest data without consent.                                                 | Vertical 9:16, premium editorial illustration. Wide shot of Ziah standing in front of a courtroom-like setting, with a gavel and legal documents subtly visible. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights the gavel. Negative space is maintained in the lower-middle third.                                                                                                                              |
| 7 | The truth? Cookies aren't about remembering your login. They're about remembering how much you're worth.                                          | Vertical 9:16, premium editorial illustration. Close-up of Ziah holding a price tag with a burnt orange (#C96C2B) accent. The background is near-black (#0B0D10), with warm white (#F7F2E8) lighting. His expression is revelatory, and negative space is preserved for captions.                                                                                                                                                                                                   |
| 8 | So clear your cookies, use a privacy-focused browser, or just say no.                                                                             | Vertical 9:16, premium editorial illustration. Medium shot of Ziah in a home workspace, gesturing toward a laptop screen displaying a browser settings page. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights the 'Clear Cookies' button. Negative space is maintained in the lower-middle third.                                                                                                                 |
| 9 | The next time you see that pop-up, ask yourself: Who's really getting the better deal?                                                            | Vertical 9:16, premium editorial illustration. Close-up of Ziah with a slight smirk, directly engaging the viewer. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent subtly frames his face. Negative space is preserved in the lower-middle third.                                                                                                                                                                           |

|---|--------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Your Netflix binge isn't random—it's steering you toward shows that cost you more time.                      | Close-up of Ziah standing in a near-black investigative studio. Warm white key light highlights his focused face. He leans forward, finger raised with a small burnt orange notebook on the desk edge. Expression intense, direct eye contact. Framing leaves lower-middle third negative space for captions. |
| 2 | Every time you scroll in the Netflix app, you think you're choosing freely, right?                           | Medium shot of Ziah in a dimly lit home workspace. He holds a smartphone, thumb mid-scroll. Warm white lamp casts soft light; burnt orange coffee mug sits on desk edge. His expression is curious, eyebrows slightly raised. Lower-middle third clear.                                                       |
| 3 | But that endless row of thumbnails is curated by an algorithm learning your every pause and click.           | Wide shot of Ziah standing next to a wall-sized screen showing abstract blurred rows of thumbnail shapes. His side profile, one hand pointing at screen. Studio backdrop near-black; warm white accent light rim on his arm; small burnt orange sticky note on screen edge. Lower-middle third clear.         |
| 4 | It nudges you toward content designed to keep you watching—chipping away at hours you could spend elsewhere. | Medium shot of Ziah in office setting. He cradles a small hourglass rimmed in burnt orange. Facial expression shows mild frustration. Warm white desk lamp behind him illuminates near-black background. Lower-middle third clear.                                                                            |
| 5 | Every view feeds a taste profile. Recommendations shift. You're trapped in a feedback loop.                  | Close-up of Ziah in investigative studio. Warm white backlight highlights edge of his profile. He holds up two fingers as he outlines steps like a chain. A subtle burnt orange paperclip attaches to his lapel as accent. Lower-middle third clear.                                                          |
| 6 | Between 2019 and 2021 Netflix said 80% of watched hours came from its suggested list (Netflix Tech Blog).    | Wide shot of Ziah seated at a desk in a home workspace. He scans a printed page labeled 'Tech Blog'—text blurred. The page has a small burnt orange corner. Warm white overhead light; near-black surrounds. Ziah's posture is leaned in. Lower-middle third clear.                                           |
| 7 | The contradiction: that curated freedom locks you in a narrow loop, not open choice.                         | Medium shot of Ziah standing, arms open in a revealing gesture. Warm white spotlight from above; near-black background. A thin strip of burnt orange light draws attention to his hands. Expression confident. Lower-middle third clear.                                                                      |
| 8 | To break free: clear your viewing history, explore by genre, and try fresh service trial codes.              | Wide shot of Ziah seated, showing three fingers. Each fingertip illuminated by a tiny burnt orange glow. Warm white soft light; near-black background. He nods encouragingly. Lower-middle third clear.                                                                                                       |
| 9 | If Netflix knows you better than you know yourself, what will you watch next?                                | Close-up of Ziah in investigative studio. Warm white fill light softens features; near-black surrounds. He taps his temple, expression inquisitive. A hint of burnt orange light highlights one cheek. Lower-middle third clear.                                                                              |

### How Netflix Recommends Your Next Show

*Ziah Decodes reveals what's actually deciding your next binge — and it's not your taste.*

**151 words** ✕ outside 115–145

| # | VOICEOVER                                                                                                       | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                         |
|---|-----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | That show Netflix suggested wasn't a guess. It was a calculation, aimed at keeping you watching.                | Close-up, vertical 9:16, editorial illustration style. Ziah's face lit by a soft screen glow, eyes narrowed with curiosity at an off-frame display. Near-black background, warm white glow on his features, a thin burnt orange highlight along the screen edge. Caption-safe space in lower-middle third. No on-screen text.        |
| 2 | You finish an episode, the next one starts in ten seconds, and somehow you never scroll away.                   | Medium shot, vertical 9:16, home workspace setting. Ziah sits on a sofa edge, remote loosely in hand, leaning forward slightly toward an unseen screen with a knowing half-smile. Near-black room tones, warm white ambient light, small burnt orange accent on the remote button. Caption-safe lower third. No text rendered.       |
| 3 | It's not chance. Every thumbnail, every row order, every autoplay is chosen by pattern, not personality.        | Wide shot, vertical 9:16, investigative studio. Ziah stands beside a large illustrated grid board showing rows of blank rectangles arranged like a menu layout. Near-black studio backdrop, warm white grid lines, single burnt orange rectangle highlighted among neutral ones. Caption-safe space below. No on-screen text.        |
| 4 | You lose hours to a feed built to hold your attention, not to match your actual interests.                      | Close-up, vertical 9:16. Ziah rubs his temple lightly, tired but composed expression, eyes cast slightly downward. Near-black background, warm white rim light, faint burnt orange clock icon hovering softly out of focus behind him. Caption-safe lower-middle space. No text.                                                     |
| 5 | Your clicks feed an algorithm, the algorithm ranks thousands of titles, and the top row is built just for you.  | Medium shot, vertical 9:16, home workspace. Ziah traces a hand along an illustrated flow diagram floating beside him showing three connected steps. Near-black backdrop, warm white outlines, burnt orange accent on the final step. Focused, explanatory expression. Caption-safe space lower-middle. No text rendered.             |
| 6 | Netflix has said publicly that over eighty percent of viewing comes from its recommendation system, not search. | Wide shot, vertical 9:16, investigative studio. Ziah stands near a large illustrated bar chart on a display board, one bar towering over the others, studying it with arms crossed. Near-black studio, warm white chart outlines, burnt orange fill on the tallest bar. Caption-safe lower third. No visible logos or text in image. |
| 7 | So it's not really recommending your next show. It's recommending whatever keeps you from leaving.              | Close-up, vertical 9:16. Ziah looks directly into camera, calm and steady, a slight knowing tilt of the head, near-black background. Warm white rim light on his shoulder, a single burnt orange play-button icon floating subtly at a distance, not obscuring his face. Caption-safe lower-middle space. No text.                   |
| 8 | Turn off autoplay, set a viewing timer, and search for titles instead of scrolling the rows.                    | Medium shot, vertical 9:16, home workspace. Ziah counts on three fingers while facing camera, confident and instructive posture. Near-black background, warm white desk and sofa setting, burnt orange highlight on the third finger. Caption-safe lower third. No on-screen text or labels.                                         |
| 9 | The algorithm isn't reading your taste. It's reading your habits. So who's really choosing your next show?      | Wide shot, vertical 9:16, investigative studio. Ziah stands centre-frame, arms slightly open in a closing gesture, direct gaze at camera. Near-black backdrop, warm white studio lighting, single burnt orange accent light behind him. Generous caption-safe space in lower-middle third. No text rendered in image.                |

| # | VOICEOVER                                                                                                           | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                                    |
|---|---------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | You think you picked that show, but an algorithm selected it before you even opened the app.                        | Vertical 9:16 premium editorial illustration. Medium shot of Ziah standing in a dark investigative studio, holding a remote control pointed toward the viewer. Palette of near-black #0B0D10 and warm white #F7F2E8, with a subtle burnt orange #C96C2B accent highlighting the tip of the remote. Ample caption-safe negative space in the lower-middle third. |
| 2 | You sit down on a Friday night, scrolling through rows of titles for twenty minutes.                                | Vertical 9:16 premium editorial illustration. Wide shot of Ziah sitting on a minimalist dark sofa in a modern UK home workspace, looking thoughtfully at a dimly glowing screen off-camera. The dark environment uses near-black #0B0D10 tones with warm white #F7F2E8 key lighting. Lower-middle third kept clear for captions.                                |
| 3 | Every account sees a completely different home screen, custom-tailored in real time.                                | Vertical 9:16 premium editorial illustration. Close-up framing of two tablet screens laid side by side on an office desk, showing contrasting abstract layout grids. A burnt orange #C96C2B accent highlights a specific grid node on one screen to direct attention. Near-black and warm white palette with clear lower-third space.                           |
| 4 | This keeps you browsing longer, trading hours of sleep for algorithmic retention metrics.                           | Vertical 9:16 premium editorial illustration. Medium shot of Ziah standing beside a dark office wall, arms crossed, looking at the camera with a sharp, reflective expression. Ambient lighting in warm white #F7F2E8 against a near-black #0B0D10 backdrop, with caption-safe space preserved below.                                                           |
| 5 | The system logs when you pause, fast-forward, rewatch scenes, or abandon a series early.                            | Vertical 9:16 premium editorial illustration. Close-up shot of Ziah holding a dark glass touchpad, pressing a control button. A crisp burnt orange #C96C2B signal path illuminates across the surface, representing data tracking. Near-black and warm white palette with ample lower-middle negative space.                                                    |
| 6 | It even switches thumbnail artwork dynamically; romance fans see a couple, action fans see a chase scene.           | Vertical 9:16 premium editorial illustration. Wide shot showing two distinct poster frames mounted in a studio setting, one highlighted with a subtle burnt orange #C96C2B border while the other remains muted in warm white #F7F2E8. Near-black background with caption-safe lower third.                                                                     |
| 7 | The app isn't recommending what's objectively best; it's predicting what will prevent you from cancelling.          | Vertical 9:16 premium editorial illustration. Medium shot of Ziah leaning against a high-top workstation in a sleek office, gesturing toward a focal node on a dark background panel. Palette composed of near-black #0B0D10 and warm white #F7F2E8 with burnt orange accents. Clear lower-middle third.                                                        |
| 8 | Reset your watch history periodically, or search directly for specific titles rather than relying on homepage rows. | Vertical 9:16 premium editorial illustration. Close-up framing on a hand using a sleek dark laptop trackpad to select a clear-data option, with a subtle burnt orange #C96C2B accent on the interface element. Palette of near-black and warm white, leaving lower-middle space free.                                                                           |
| 9 | Will you let the algorithm choose your next show?                                                                   | Vertical 9:16 premium editorial illustration. Medium shot of Ziah standing in an investigative studio setting, looking directly into the camera with an engaging, inquisitive expression. Palette of near-black #0B0D10, warm white #F7F2E8, and a single burnt orange #C96C2B accent. Ample caption-safe space in the lower-middle third.                      |

## How Netflix Recommends Your Next Show

Ziah decodes the real engine behind Netflix's 'Because you watched' suggestions — not magic, but a ranking system built on your pause, skip and binge data. One clear chain, one documented example, and three practical ways to take back control.

175 words X outside 115–145

| # | VOICEOVER                                                                                                                                                                                  | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                     |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Netflix doesn't just guess what you'll watch next. It decides what you almost never see.                                                                                                   | Vertical 9:16 premium editorial illustration, near-black background with warm white accents. Close-up of Ziah looking slightly past camera with a sharp, curious expression, one hand hovering over a blank remote as a single burnt-orange accent glows on the play icon. Caption-safe negative space in lower-middle third. No text, no logos. |
| 2 | You finish an episode and the next one auto-plays. Feels like the algorithm knows you.                                                                                                     | Vertical 9:16 premium editorial illustration. Medium shot of Ziah on a sofa in a modest living-room workspace, leaning forward toward a blank television screen, warm white lamp light, near-black walls. Burnt-orange accent only on the edge of the remote in his hand. Caption-safe lower third. No text, no logos.                           |
| 3 | But the same ranking logic runs for every UK subscriber. It's not personal intuition. It's a production system.                                                                            | Vertical 9:16 premium editorial illustration. Wide shot of Ziah standing in a clean investigative studio, multiple identical blank screens arranged behind him like a grid. Near-black palette, warm white overhead light, single burnt-orange accent on one central screen. Caption-safe space. No text, no logos.                              |
| 4 | The cost? Hours of your evening get steered toward shows that keep you subscribed longer, not necessarily the ones you'd choose cold.                                                      | Vertical 9:16 premium editorial illustration. Close-up of Ziah's hand resting on a notebook beside a laptop, burnt-orange highlight tracing a thin path from screen to clock hands. Near-black desk, warm white paper. Caption-safe lower third. No text, no logos.                                                                              |
| 5 | Here's the chain: every pause, skip, binge and rating is logged, those signals train ranking models, the models order the homepage so the most likely keep-watching title sits at the top. | Vertical 9:16 premium editorial illustration. Medium shot of Ziah at a desk in an office, pointing at a simple three-step flow — signal, model, ranked list — only the middle model step edged in burnt orange. Near-black background, warm white desk lamp. Caption-safe space. No text, no logos.                                              |
| 6 | Netflix's own research papers and engineering blogs have described how collaborative filtering and deep learning rank titles using billions of such interactions.                          | Vertical 9:16 premium editorial illustration. Wide shot of Ziah in a modern office holding an open research paper, burnt-orange accent on the page edge. Clean near-black walls, warm white lighting. Caption-safe lower third. No text, no logos.                                                                                               |
| 7 | So the recommendation isn't mainly about discovering hidden gems. It's about keeping the next episode frictionless enough that you stay.                                                   | Vertical 9:16 premium editorial illustration. Close-up of Ziah looking straight at camera, calm investigative expression, one finger resting on a blank 'next episode' icon lit only in burnt orange against near-black. Warm white rim light. Caption-safe space. No text, no logos.                                                            |
| 8 | Clear your viewing history now and then. Rate shows you actually finish. Search instead of scrolling the homepage.                                                                         | Vertical 9:16 premium editorial illustration. Medium shot of Ziah at a desk performing three clear actions: swiping a history list away, tapping a rating star, typing in a search bar — only the search action edged in burnt orange. Near-black workspace, warm white light. Caption-safe lower third. No text, no logos.                      |
| 9 | Next time the homepage fills itself, will you still let it choose for you?                                                                                                                 | Vertical 9:16 premium editorial illustration. Close-up of Ziah leaning slightly forward, open questioning expression, one hand extended toward camera as if offering the remote. Near-black background, single warm white light source, faint burnt-orange glow on the open palm. Caption-safe space. No text, no logos.                         |

## 5 Mistral

### How Netflix Recommends Your Next Show

Ziah uncovers the hidden algorithm that decides what you watch next—and why it's not as personal as you think.

147 words ✕ outside 115–145

| # | VOICEOVER                                                                                                                                                                 | IMAGE PROMPT                                                                                                                                                                                                                                                                                                                                                            |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Netflix doesn't want you to watch what you love. It wants you to watch what keeps you scrolling.                                                                          | Vertical 9:16, premium editorial illustration. Close-up of Ziah in a dimly lit investigative studio, framed from the chest up. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights a remote control in his hand. His expression is sharp and provocative, with negative space in the lower-middle third. |
| 2 | You've been there: 2 AM, autopilot, letting Netflix pick your next binge.                                                                                                 | Vertical 9:16, premium editorial illustration. Medium shot of Ziah in a home workspace, leaning back in a chair with a laptop open in front of him. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights the laptop's edge. Negative space is maintained in the lower-middle third.                       |
| 3 | But this isn't random. 80% of what you watch on Netflix comes from its recommendations.                                                                                   | Vertical 9:16, premium editorial illustration. Wide shot of Ziah standing in a modern office, gesturing toward a whiteboard with a grid-like pattern (no text). The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent traces a path on the grid. His expression is analytical.                                        |
| 4 | The cost? Your time. The average UK user spends 14 minutes a day deciding what to watch—time Netflix turns into data.                                                     | Vertical 9:16, premium editorial illustration. Close-up of Ziah holding a stopwatch with a burnt orange (#C96C2B) accent. The background is near-black (#0B0D10), with warm white (#F7F2E8) lighting. Negative space is preserved in the lower-middle third.                                                                                                            |
| 5 | Here's how it works: Netflix tracks what you watch, when you pause, even when you skip the credits. That data feeds an algorithm that predicts what will keep you hooked. | Vertical 9:16, premium editorial illustration. Medium shot of Ziah in a studio, pointing to a transparent screen displaying a network of nodes (no text). The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights a central node. Negative space is maintained.                                              |
| 6 | In 2021, Netflix revealed that 90% of UK users who started 'Squid Game' finished it—thanks to its recommendation engine.                                                  | Vertical 9:16, premium editorial illustration. Wide shot of Ziah in a living room setting, with a TV screen glowing subtly in the background. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights the TV's power button. His expression is revelatory.                                                   |
| 7 | The truth? Netflix isn't recommending shows. It's recommending addiction.                                                                                                 | Vertical 9:16, premium editorial illustration. Close-up of Ziah holding a chain of paper clips with a burnt orange (#C96C2B) accent. The background is near-black (#0B0D10), with warm white (#F7F2E8) lighting. Negative space is preserved in the lower-middle third.                                                                                                 |
| 8 | So limit autopilot, explore manually, or just turn off autoplay.                                                                                                          | Vertical 9:16, premium editorial illustration. Medium shot of Ziah in a home workspace, reaching for a remote control. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent highlights the remote's buttons. Negative space is maintained.                                                                           |
| 9 | The next time Netflix picks for you, ask yourself: Who's really in control?                                                                                               | Vertical 9:16, premium editorial illustration. Close-up of Ziah with a slight smirk, directly engaging the viewer. The palette is near-black (#0B0D10) with warm white (#F7F2E8) lighting. A burnt orange (#C96C2B) accent subtly frames his face. Negative space is preserved in the lower-middle third.                                                               |
